STRATEGIC PITCH · PREPARED BY STARKITE TECHNOLOGIES

LabourSphere

Labour expertise, delivered as a system. A technology-enabled labour advisory and workplace solutions business for Namibia.

Developed by STARKITE Technologies 2026

THE PROBLEM

Good labour guidance is hard to reach.

Labour matters are complex, and practical specialist help is not always easy or affordable to get.

SMEs

Often have no dedicated employee-relations or specialist HR capability.

Employees

Struggle to understand their rights, responsibilities and options.

The result

Procedural mistakes, weak documentation, compliance gaps and disputes that could have been prevented.

THE VISION

Not a consultancy that sells time.

A business where professional expertise is turned into intellectual property, systems and repeatable solutions, delivered digitally and at scale.

Accessible
Clear answers on any phone or computer.

Practical
Tools that solve a defined workplace problem.

Affordable
Priced for SMEs and individuals.

Human where it counts
Professionals step in when judgement matters.

WHO WE SERVE

Starting in Namibia.

Primary: small and medium businesses

Need reliable labour support but cannot justify a full-time specialist.

Employees

Looking for accessible workplace information and guidance.

Over time

Larger organisations, HR practitioners, NGOs, professional bodies and training institutions.

COMMERCIAL MODEL

Five layers of value.

1. Free educational content	Builds trust, visibility and authority.
2. Digital products	Templates, toolkits and checklists sold repeatedly.
3. AI-assisted solutions	Guided help and document support, with safeguards.
4. Professional consultations	For matters needing assessment and judgement.
5. Bespoke advisory	Policies, investigations, audits, dispute support, training.

THE OPERATING SYSTEM

One connected system, not a website with a chatbot.

A customer discovers LabourSphere, identifies the problem, gets guidance, pays, completes intake and receives the output, with minimal manual administration.

Discover → Qualify → Guide → Pay → Book → Intake → Deliver → Follow up → Report

Developed by STARKITE Technologies 2026

AI WITH SAFEGUARDS

AI amplifies expertise. It does not replace it.

Automate

Lead capture, payments, bookings, reminders, product delivery, follow-up, reporting.

AI-assisted

Issue identification, general guidance and document support, drawn only from a curated and version-controlled knowledge base.

Keep human

Complex, sensitive or high-risk matters are always escalated to a professional.

SEE IT WORKING

The demo shows the full journey.

1

Issue Checker

Three questions sort a matter into low, medium or high risk.

2

Guides and products

Free guidance, plus templates that generate a ready document.

3

Booking

High-risk matters are routed to a consultation.

4

Owner view

Enquiries, orders, revenue and the human review queue.

ROADMAP

Built gradually, over about three years.

PHASE 1

Build

- Brand, website, domain
- Knowledge architecture and IP
- First digital products
- CRM and initial automation

PHASE 2

Validate and automate

- Test demand and pricing
- Grow an audience
- Introduce AI-assisted services
- Repeatable customer journeys

PHASE 3

Transition and scale

- Functioning platform
- Validated products and revenue
- Documented processes
- Founder moves full-time

MINIMUM VIABLE LABOURSPHERE

The right foundation, without over-investing.

Build now

- Website with free guides
- Issue Checker (rule-based)
- Three to five digital products
- Simple CRM and email list

Add once demand is proven

- Online payments and booking
- Document generator
- AI assistant on the knowledge base
- Owner analytics dashboard

Defer

- Consultations and bespoke advisory, until the founder's employment obligations allow
- Regional expansion

THE OUTCOME

Not "How do I start a consultancy?" but "How do I scale the system I have already built?"

Expertise creates the IP. Technology distributes it. AI amplifies it. Automation runs it. People handle what matters most.
